

Fun For The Entire Family

Farmersgolf is new to North America. Bonar's course is the first in New Brunswick.

There are 10 holes, which will take you through the pasture. There are some hazards to overcome. The holes are 10-inch diameter.

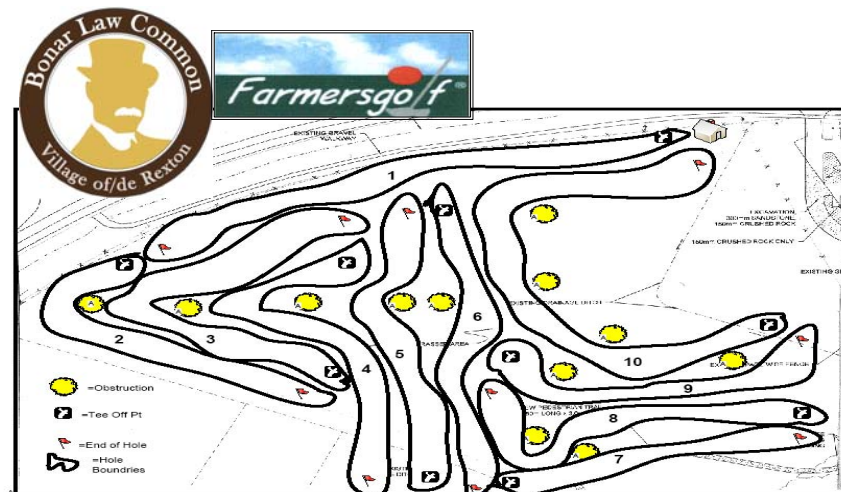

With the game originating in Holland the clubs are wooden and in the shape of a shoe. The most difficult holes will take you across the gully and back and watch out for the water on number 7. The game is best played in two groups, with 1-3 players in each group.

Members of each group will take turns hitting the ball. The groups with the least strokes... win!
